

TO PRESERVE THE SOFTNESS OF FLANNEL GARMENTS, FOLLOW CAREFULLY THESE DIRECTIONS FOR WASHING.

Dissolve thoroughly in boiling water some IVORY SOAP, shaved fine. Add sufficient warm water to wash the flannels in one by one. Don't rub any soap on the flannels, but knead them well in the solution.

Don't rinse them in plain water; use a fresh supply of the solution, warm, and well blued, for the purpose.

Don't wring tightly with the hands, use a clothes-wringer. The force from water you get these garments the softer they will be.

Hang them out immediately, if the weather will permit; if not, dry before the fire. If left to stand wet, the flannel will certainly shrink.

Never wash flannel in water too hot to bear your hand in.

Never rinse them in cold water.

Always use IVORY SOAP, it is the best, much experience has proved this.

A WORD OF WARNING.

There are many white soaps, each represented to be "just as good as the 'Ivory'"; they ARE NOT, but fill all counterfeits, lack the peculiar and remarkable qualities of the genuine. Ask for "Ivory" Soap and insist upon getting it.

UNDERGROUND WATERS.

The important Pass They Play in the Formation of Minerals.

The mode of formation, as Buffon said, is the genesis of minerals is one of the most interesting questions of their history. But the problem could not be approached until geologists had furnished precise data on the conditions of their bearing. Satisfactory solutions have recently been obtained in the case of a certain number of mineral species. Synthetic experiments, placing them in the circumstances that seem to have prevailed at their formation, have suggested a way of reproducing them with their crystalline forms, and all these completed the demonstration of their origin. By means of this method of demonstration, we have been able to ascertain that many minerals are due to the action of subterranean waters. From the most ancient epochs, these waters have circulated through the crevices of the earth, where they have left, at a multitude of points, signs respecting the part they have played, and the courses they have taken, even more clearly than contemporary phenomena have done.

The sedimentary beds, formed like the deposits which the sea spreads every day in the bottom of its basin, are often distinguished from one another, even at first sight, by certain exterior characters. The different names for the most part produced by the action of subterranean waters, as is demonstrated by the animal and vegetable fossils, which were for a long time designated as petrefactions; or, rather, by the chemical changes which these fossilized bodies have evidently undergone.

Here, shells and corals, showing forms perfectly preserved down to their slightest details, are no longer composed of carbonate of lime, as they certainly were during the life of the animal to which they belong, but are essentially different substances, quartz having entirely taken the place of the calcareous carbonates. There are also other minerals, such as pyrites and sulphate of baryta, which have been penetrated and crystallized within the cavities which the bodies of those invertebrates occupied.—Prof. G. A. Daubre, in *Popular Science Monthly*.

Among the dead letters this year was one addressed to Charles Dickens, the lecturer, requesting a copy of "your latest novel, 'Crispus on the Heath.'

Scurf Cured.

LEXINGTON, VA., July 14, 1888.

The Swift Company, Atlanta, Ga.; General Agents for the South.

They have just asked me about your medicine, and having used it I am in position to say something about it.

Nine years ago Scurf Cured made its appearance in my family. Two of my children—one a boy of six and a girl of four years—were terribly afflicted with this terrible disease. My family physician treated the malady for a time, but with no success. In my case, however, I saw my remedy advertised, and began using it, and in no time improvement was observed. My children to-day are free from the trouble, and I am never without a bottle of S. S. S. in my house.

BACKWARD EYEBROWS.

A Tensorial Artist Preserves a Treatment Which He Guarantees.

"Will you have your eyebrows treated, sir?" asked an attendant in a fashionable tinsmith establishment on Broadway the other evening. The customer assented and when the operation was completed a reporter asked the chair vacated. When he asked the man what treating the eyebrows consisted of and what was the object, he replied:

"You have noticed that there are many people who have very faint eyebrows, in many cases being nearly imperceptible. This, of course, is very annoying to those who pride themselves on their personal appearance, and I conceived the idea of attempting to remedy the defect. First, I clip the hairs to an equal length, and then gently but thoroughly rub the skin with sweet oil. Of course one trial will not accomplish the end, but a few will. Should the hair of the brows fall out or be burned, I use a compound of five grains of sulphur of quinine and one ounce of alcohol. This will usually cause the hair to grow, but will make it soft and glossy."

"How many come to you for this purpose?"

"Oh, yes. I generally effect an improvement in a few sittings, and if in some cases the hair will not grow thickly at first, why the customer returns with the hope that it may be induced to do so later, which nearly always is the case."—N. Y. Mail and Express.

A young traveling man had been going to see a charming lady for a good while and had just proposed to her for the seventeenth time. "Can't you take no for an answer?" she inquired in a tone that showed decided annoyance. "No, not exactly," he replied, meekly. "But I'll try to get along with it if you can give me a better one."—Marital Troubles.

"The cry is still they come" for COUSIN HONEY OF TAN, because it is the only remedy that will positively cure coughs, colds and all diseases of the throat and lungs. For sale by H. B. Garner.

We warrant TAYLOR'S SURE CHILL CURE to give entire satisfaction in all cases that it is recommended for, provided the contents of a bottle are used according to directions. For sale by H. B. Garner.

COUSIN'S HONEY OF TAN and DR. TABLE'S SURE OINTMENT are good sellers with us, also WHITE'S CREAM VERNIFLU, but TAYLOR'S SURE CHILL CURE, All appear to give satisfaction wherever used. For sale by H. B. Garner.

WHITE'S CREAM VERNIFLU is the largest 25 cent ointment medicine in the market, the dose being small, it is the cheapest. It is its own purgative, and does not require to be followed by the nauseous dose of castor oil or other purgative medicine. Full directions on every bottle. For sale by H. B. Garner.

D. S. TRUITMAN, West Fork P. O., Ryepoint County, Mo., writes as follows: "I sold one bottle of WHITE'S CREAM VERNIFLU to my neighbor, Mr. Allen Moore. He gave the medicine to his wife and children, and it brought from them full 300 cures. This, I think, is worth calling attention to the friends of children and enemies to worms. I will soon order more of the VERNIFLU." For sale by H. B. Garner.

The next session will begin TUESDAY, SEPT. 4.

This school has an enviable record for thorough methods of teaching pursued.

The Cramping process in Education is studiously avoided, as well as the machine methods of many, so called, grade schools.

To know from memory is good, but to be able to know by thought is better. Pupils are directed to the exercises of all their better powers.

The family will remain, salt has been for a year past except the prof. of Drabfield for the following reasons:

It will be solemmed by PROF. FLEMING.

It will be solemmed by PROF. FLEMING.
